There is an air of delightful secrets and anticipation at a box supper that will entrance you as it has your parents, grandparents and great-grandparents before you, for the box supper is a form of social entertainment as old as America itself.

All you men, whatever your age, are to do — bring to the supper a good appetite and some folding money to bid on those pretty boxes filled with the most tantalizing of foods, which the auctioneer will display and present to the highest bidder. Then, with the prize under your arm, you lead the gal who spent all those hours pre-

Patsy Wroten Asks City Council Spot

Patsy Wroten, 31-year-old Pahokee housewife, qualified Wednesday morning to run for a place on the city council in Pahokee. Mrs. Wroten qualified for the Group 2 spot now held by George Tucker who has not announced his intention to seek reelection. R. F. Hurt has qualified in Group 1, seeking the council seat now held by Karl Mindlin, who in all probability will not seek reelection.

Pahokee's 2nd announced woman council candidate is the daughter of the late B. Elliott who served many years as state representative and was Speaker of the House in 1947. Her brother, B. Elliott, Jr., was elected to the council a few years ago but resigned in order to continue his education at Florida State University.

One of the items that has the new candidate provoked is the condition of the streets in Pahokee during the long drawn-out program of installing sewers. She is interested in seeing that something is done about the terrible state of street repair and more beautification of the city in general.

"There is a definite need for a woman on the council," Mrs. Wroten stated, "and as a mother of three children I am keenly interested in the problems of our community."

An active member of the First Baptist Church, Mrs. Wroten teaches a class of young married people. She also sings in the church choir. She is also a member-at-large of the Pahokee Women's Club.

"Although I have not had much time to prepare a platform," she said, "I think one thing must be done. The public should be better informed as to what is going on at the council meetings."

Here Is What Transpired At Monday's Meeting Of The Palm Beach County Commission

The Boca Raton Chamber of Commerce has asked the County Commission to contribute \$2500 to help finance dredging of the Boca Raton inlet—a temporary operation to permit greater use of the waterway.

The chamber said the U. S. Engineers have approved the dredging project, which is being partially financed by funds raised by the Chamber of Commerce.

The county, according to Commissioner George Warren, had at one time considered budgeting funds for the improvement.

The commission instructed its comptroller and attorney to re-

view the original request from the Chamber, made several months ago, and report the findings back to the board.

In other actions the commission: Voted to go ahead with construction of a bridge on Congress Ave. over L-32 at a cost of about \$25,000.

Took under advisement the possibility of improving a 2 1/4 mile stretch of Lawrence Road.

Agreed to make available 125,000 yards of sand for Palm Beach Junior College campus and instructed the engineering department to work out arrangements for payments from the school board.

Asked that improvement of Clint Moore Road be stepped up in an effort to prevent accidents—there were three over the past weekend.

Approved location for a new detention center in the area of the county hospital on 45th street, in West Palm Beach.

Voted to meet in administrative session with Richard Pilger of the county information bureau in connection with drafting procedures for a monthly activity report from that department.

Heard that Mrs. Viola Brewster, West Palm Beach, has been named one of Florida merit mothers as a result of her work in the county Home Demonstration activities. Mrs. Brewster will go to Tallahassee March 16 to compete for the title of Florida Mother.

Split Vote Sends 2 To Costa Rica

County Commissioners split three to two Monday on the question of who was going to represent the county in San Jose, Costa Rica for dedication of a new Little League ball field to be named for West Palm Beach.

Mayor Fred Easley, West Palm Beach, in a letter to the county board asked that Commissioner Edward Bandlow be designated since he had been instrumental in helping host a delegation of visiting Costa Ricans when the group came to the area.

Bandlow asked that he and Chairman Lake Lytal be permitted to make the March 14 trip. Commissioner E. W. Weaver seconded the motion.

Commissioner George Warren and E. F. Van Kessel voted against the measure. Van Kessel said both he and Bandlow had already visited Costa Rica and he thought some other commissioner should be sent—in fact he moved that authority be voted for any or all of the five members to make the trip.

Commissioner Warren objected since he said he didn't have enough knowledge of the background of the exchange junkies.

Chairman Lytal said he would vote for only two members making the trip and offered to withdraw his name if someone else wanted to accompany Mr. Bandlow.

Final vote was for Bandlow and Lytal to make the trip.

A plaque was presented by Ernest O. Miller, fair president, to H. T. Vaughn, president of U. S. Sugar Corp., in recognition of the dedication.

The sugar corporation was cited by the fair group for the donation of land on which the fair grounds are located in addition to annual contributions of cash to aid in the financing of the exhibition.

County Board Will Help Build Park

Representatives of South Bay asked that the county construct and maintain a road from U. S. 27 across the Lake Okeechobee levee to a parking area. Also that the county design and construct a toilet building in the area.

The Commission agreed to aid in the development and authorized Commissioner E. W. "Bud" Weaver to work out details for financing the work. The commission also instructed its engineering department to make an overall plan for the park project.

In another action concerning recreational facilities in the Glades, the commission, at the suggestion of Commissioner Weaver, adopted a resolution asking the State II Board to turn over title of 56.2 acres of land on the Miami canal for recreational purposes.

New $3\frac{3}{4}\%$ interest on U.S. Savings Bonds

*The Treasury explains why the new ones you buy and the ones
you own now are better than ever*

Q: How does the new $3\frac{3}{4}\%$ interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to $2\frac{1}{4}\%$ for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?

A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra $\frac{1}{4}\%$ from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

Q: Will the Bonds I own automatically earn their new rate?

A: Yes. You don't need to do a thing—just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic $\frac{1}{4}\%$ increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.

Q: How are series H Bonds different from series E Bonds?

A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

YOU SAVE MORE THAN MONEY WITH U. S. SAVINGS BONDS

Eastern Air Lines Buys New Planes

MIAMI—Eastern Air Lines has placed an order with the Douglas Aircraft Co., Inc., for a fleet of 24 of an advanced model of the short-to-medium range twin-jet Douglas DC-9, the newest in jet airliners.

The purchase represents an investment of approximately \$84 million and will enable Eastern to provide jet service to many additional communities which cannot be effectively served by the larger jets now in operation.

An interim lease arrangement has been arranged with the manufacturer calling for delivery of 15 standard DC-9's on a schedule beginning in March, 1966 and ending in September, 1966. Deliveries of Eastern's more advanced and slightly larger DC-9's will begin in the latter part of the year, with expected certification in November, 1966.

The DC-9 is a twin fan-jet aircraft with T-tail and rear-mounted engines. It will be powered by two Pratt & Whitney by-pass fan-jet engines. With a capacity of 80 passengers, the DC-9 will be capable of unrestricted operation out of most airports. Its normal cruising speed is 560 mph.

Would Make Citrus A Must On Diet

LAKELAND—An army of some 700,000 salesmen "are eager to restore citrus products to their position as an indispensable part of the American diet," the Florida Citrus Commission was told at a special meeting in Lakeland.

The commission heard the report of a nine-month study which was authorized to learn what nutrition authorities of America think of Florida citrus products.

Dr. Cortez F. Enloe, Jr., president of Cortez F. Enloe, Inc., the commission's medical and ethical advertising agency, reported that "to the people who mold the eating habits of America, citrus products are superior to any synthetic products". The superiority, he continued, is sufficiently clear-cut that it can be the basis of all promotion efforts of the commission.

The 150-page report revealed that nutritionists, dietitians, physicians and others will get behind a nutrition program to sell Florida citrus. This group of 700,000 will be converted into salesmen for citrus, according to Dr. Enloe.

Early and mid-season control with Phosdrin hits insects hard, cleans them up fast.

Close-to-harvest insect control with Phosdrin gives you an unbeatable way to insure crop quality.

Now, Phosdrin is an all-season insecticide

*—vegetable growers are using its
hard-hitting control and fast disappearance in every spray.*

The special effectiveness that has always made Phosdrin® Insecticide profitable for late-season use is now protecting vegetables throughout their growth. Here's why:

THE 5- to 7-day spray schedules authorities now recommend have changed the role of Phosdrin. With its rapid speed of kill and near-perfect insect control, Phosdrin is extremely effective in the new short-interval spray schedules.

Also important in the new programs: Phosdrin is competitive on a cost per acre basis and its fast disappearance eliminates problems.

Insects and residues both vanish

A Phosdrin spray cleans up a broad spectrum of insects in a matter of minutes—aphids, mites, loopers, worms, almost all destructive pests attacking vegetables. Because control is

so thorough, insects can't build to damaging levels between sprays. And, of course, accidental drift to a nearby field also disappears rapidly.

Phosdrin makes it easy to avoid problems—all season and close to harvest. It's gone from the field a few hours after application.

Complete control is economical

Phosdrin alone, protects lettuce, tomatoes, beans, peppers, celery, watermelons, eggplant and many other vegetables. There's no need to add another insecticide and raise costs... even if resistant insects are present. Phosdrin stops them too. And it offers a wide margin of safety to leaves and fruit of insecticide-sensitive crops like cucumbers and lettuce.

A little Phosdrin goes a long way. As little as ¼ pound per acre is all it takes to end the damage of most vegetable insects. Dosage rates seldom exceed ½ pound per acre. Check

into costs and consider the overall protection Phosdrin gives you and your crop, and you'll see why it pays to use Phosdrin all season.

Phosdrin is available from your local insecticide dealer under many well-known brand names, or as a product of Shell. In liquid or dust.

Shell Chemical Company, Agricultural Chemicals Division, 55 Marietta Street, N.W., Atlanta 3, Georgia.
